Mar. 20, 1938.

Serpentine outcrop on Coyote Creek, 3 miles east of Madrone on road to Madrone Springs, Santa Clara Co. (With Lewis S. Rose.)

13724. *Ceanothus Ferrissae* McMin

Flowers creamy-white, the calyx sometimes with a purplish dot or dash on one sepal.

13725. *Dodecatheon*

In full flower or going to fruit. Peduncle with fine pubescence.

13726. *Dodecatheon*

Mostly in bud. The corolla-lobes violet at tips, almost white at base.

N.B. - The *dodecatheons* did not grow on the serpentine.

Apr. 3, 1938.

13727. *Hernieria cinerea* DC.

Clay flat, 5 miles east of
Livermore on road to Tesla,
Alameda Co.

13728. *Sagina apetala* Ard.

Flat where water has stood,
middle part of Canal Hollow,
San Joaquin Co.

13729. *Trifolium laciniatum*

With preceding. Corolla pale
with purple spot.

13730. *Trifolium depauperatum* ^{Desv.}

With preceding. Flowers purplish.

13731. *Trifolium depauperatum*

With preceding. Flowers whitish
with purple spot.

Apr. 3, 1938.

13732. *Trifolium amplexens* ^{T. & G.}
Flowers pale with dark spot.
Stems slender. With preceding.

13733. *Trifolium amplexens* T. & G.
Flowers without dark spot, larger.
Plants larger. With preceding.

The 5 clovers (& others unrelated)
grew on a flat within a few
feet of each other.

13734. *Festuca*
with the preceding.

13735. *Festuca*
Near the preceding.

Apr. 10, 1938.

Trip to Hospital Canyon,
San Joaquin Co., with
Dr. Robert Hoover.

Alkaline flat in eastern
Livermore Valley about midway
between west ends of Altamont &
Patterson passes, Alameda Co.

13736. *Puccinellia simplex*

13737. *Astrogolus tener*

Banner with white center bordered
by violet, the wings violet with
white spots near the outer end.

13738. *Allocarya humistrata*

Stems prostrate from very base.

13739. *Spargularia*.

Apr. 10, 1938.

13740. *Thiella maritima*

13741. *Trifolium cyathiferum*
Culles somewhat inflated in fruit.

13742. *Spergularia*

East side of Patteran Pass,
Alameda Co.

13743. *Collinsia bicolor*

The lateral lobes of the lower lip
violet.

13744. *Hesperomecon affine*.

Apr. 10, 1938.

Near Midway, Alameda Co.

13745. *Lisianthus bicolor*.

Limbs cream-color or pale yellowish,
throat yellow, tube rosy.

13746. *Erysimum capitatum*

Petals at first lemon-yellow,
getting paler in age.

13747. *Tropaeolum capardium*

13748. *Desmantha Sophia*

13749. *Echacholtzia unicolorata*?

Petals deep orange-red.

13750. *Sisymbrium Iris*.

Tracy, San Joaquin Co.

Apr. 10, 1938.

Hospital Canyon, San Joaquin Co.

13751. *Festuca confusa* Piper.

13752. *Festuca* Eastwoodae Piper

Only one plant seen.

13753. *Madia radiata*

Producing one of the most brilliant
floral displays I have ever seen.

13754. *Trifolium dichotomum*.

13755. *Amsinckia verrucosa*

13756. *Amsinckia* Eastwoodae

13757. *Plagiobothrys fulvus* var.
infectivus

13758. *Streptanthus lilacinus*

Petals pale & white.

Apr. 10, 1938.

Hospital Canyon, San Joaquin Co.

13759. *Eschscholtzia cuneata*.

13760. *Ribes gracillimum*

13761. *Pogogyne serpyllodes*.

13762. *Forestiera neomexicana*

13763. *Phacelia Breweri*

13764. *Streptanthus Parryi*

13765. *Cryptantha nevadensis*

13765A. *Cryptantha Clevelandii* flosa

13766. *Carex brevicaulis* Muhl.

Lake Merced, San Francisco

Apr. 12, 1938.

May 1, 1938.

Colma Canyon, San
Bruno Hills, San Mateo Co.

13767. *Castilleja*
Inflorescence yellow.

13768. *Phacelia*

13769. *Layia*

13770. *Lupinus*

13771. *Phacelia*

Corolla open campanulate,
violet

13772. *Amaranthus hybridus*

13773. *Oenothera*

May 1, 1938.

San Bruno Hills s. of
Visitation Valley, San
Mateo Co.

13774. *Carex brevicaulis*

13775. *Lupinus variicolor*

13776. *Carex substricta*

13777. *Carex tenuicula*

Near South San Francisco on Hillside
Ave. about $\frac{1}{2}$ mile - 1 mile east of
Bayshore Highway, San Mateo Co.

13778. *Carex substricta*

13779. *Carex substricta*

13780. *Carex Barbanae*

13781. *Carex Harfordii*

May 1, 1938.

13782. *Carex subbracteata*

13783. *Carex subbracteata*

13784. *Allocarya*

13785. *Carex Hurdleyi*

13786. *Carex breviligulata*

May 22, 1938.

San Anselmo Canyon sw. of
Fairfax, Marin Co.

13787. *Lupinus maricensis* Entw.
spec. nov.

13788. *Rubus*

13789. *Lionanthus acicularis*

13790. *Caryx densa* or relative

13791. *Streptanthus pulchellus*.

Inflorescence secund. Calyx a little irregular, the tips of the two lateral sepals directed upwards towards the tip of the upper sepal, bright rosy-violet, the sepals strongly carinate & concave, the keel glabrous or usually with a few scattered white trichomes. Petals unequal, the two upper with broader blades that are erect or

May 22, 1938.

somewhat recurved, parallel; the two lower narrower and divaricate, the blades of all lavender with rosy-purple veins and midrib, the claws pale greenish or tinged with a little purple. Four stamens polleniferous in two unequal pairs, the other two stamens sterile and inserted nearly or quite to the anthers. Siliques glabrous in all plants examined except two.

This differs from *S. pulchellus* as described by Greene in Man. Bay Reg. Bot., 17, in not being "much-branched," the flowers more scattered, the sterile anthers being much-reduced, and the pods being usually glabrous.

This grows on serpentine above the lowest cascade.

May 22, 1938.

San Anselmo Canyon av. of
Fairfax, Marin Co.

13792. *Festuca poufria*

13793. *Festuca Grayi*

13794. *Stipa pulchra*

13795. *Lesingia microdenia*

This and the grasses grew with
the *Streptanthus* on serpentine.

13796. *Godetia quadrivulnera typica*

13797. *Holidiscus discolor*.

13798. *Plectritis siliosa*

13799. *Rubus*

Staminate plant with broad
leaves.

13800. *Marah fabacea*
San Anselmo Canyon, Marin Co.
May 22, 1938.

13801. *Rubus*
San Anselmo Canyon, Marin Co.
May 22, 1938.

Trip with Dr. R. F. Hoover to
Madera Co.

13802. *Boerhaavia globella* *comptata*
Santa Clara - San Benito Co. line
on Bolan Road from Gilroy to
Hollister. May 28, 1938.

13803. *Limnalla aquatica*
with preceding.

May 28, 1938.

Near Hollister on Pocheco Pass
road, San Benito Co. (Where
Eastwood & Howell Nos. 5299-5308
were collected.)

13804. *Brodiaea coronaria*.

13805. *Atriplex spicata*

13806. *Navaretia cotulaefolia*
Where E. & H. No. 5308 was collected.

2 miles ne of Hollister in Lone-
tree district, San Benito Co.

13807. *Trunculus latidens*

13808. *Lepturus cylindricus*.

13809. *Gnaphalium palustre*

13810. *Allocarya trachycarpa*

May 28, 1938.

13811. *Phalaris Lemmonii*

13812. *Lolium multiflorum*.

On Arroyo Los Picachos, 3 miles
ne. of Hollister, San Benito Co.

13813. *Hortulia frutescens*.

13814. *Calochortus venustus*

13815. *Carex nudata*

13816. *Rumex californicus*

Just east of summit of Pacheco
Peak, Merced Co.

13817. *Senecio Breweri*.

13818. *Godetia purpurea*

where E. & H. No. 5333 was collected

May 28, 1938.

13819. *Hendleya laxa* var.

13820. *Phacelia* ~~sp.~~
where E. & H. No. 5329 was collected

13821. *Cirsium cymosum*.
where E. & H. No. 5302 was collected.

East base of Poobee Pass grade,
Merced Co.

13822. *Eryngium*

Arid hills 10 miles n. of Los
Banos, Merced Co.

13823. *Hemizonia obconica*.

13824. *Hemizonia Kelloggii*

13825. *Phacelia*

13826. *Spergularia atropurpurea*.

May 28, 1938.

13827. *Hellesteria lanata*

13828. *Eriogonum vestitum*

This and *Eriog. indicatum* grew on peculiar diatomaceous shale or pondering soil about to the exclusion of everything else except the *Spergularia*. Gypsum interbedded in the shale.

13829. *Eriogonum indicatum*

Stems firm woody, frequently shrubby bases. The inflated stems a peculiar blue green color with the bloom.

Flowers pale greenish white or, rather pale greenish - yellowish - white!

13830. *Eriogonum tenuissimum*

This and the 3 following grew on the higher slopes above the 2 preceding but in different soil - a regular clay soil without the diatomaceous shale or gypsum.

May 28, 1938.

13831. *Eriogonum*

13832. *Eriogonum fasciculatum*
var. *obtusiflorum*.

13833. *Eriogonum angulosum*.

2 miles south of Los Banos on
canal bank, Merced Co.

13834. *Stachys albens*.

Between Volta and Gustine,
Merced Co.

13835. *Godetia purpurea*.

13836. *Bordivalia globella* var.
campestris

13837. *Bordivalia cleistogama*.

May 29, 1938.

Buhoach, Merced Co.

13938. *Carex* *Dudleyi*

1 mile n. of Chowchilla River on
Valley Highway, Merced Co.

13839. *Eryngium*

Chowchilla, Madera Co.

13840. *Brodiaea* *clisistrogama*.

13841. *Brodiaea* *globella* var.
compressa

13842. *Psilocarphus* *globiferus*.

13843. *Psilocarphus* *tenellus*

13844. *Ervingia* *mirabilis*

13845. *Eryngium*

13846. *Navaretia* *nigellaeformis*

May 29, 1938.

4 miles east of Churchill,
Madison Co.

13847. *Godetia purpurea*.

13848. *Amanckia Eastwoodae* X
Lycopersoides - det. Ch. S. S. S.

13849. *Amanckia Lycopersoides*

13850. *Amanckia Lycopersoides*
Like 13849 but flowers a little
larger.

13851. *Salvia candicans*.

2 miles w. of Raymond, Madison Co.

13852. *Ullrichia bracteata*

13853. *Syntherisma*

May 29, 1938.

Raymond, Modera Co.

13854. *Calycadenia mollis*.

13855. *Centaurium venustum*.

13856. *Galium pubens* var.
scabridum

13857. *Godetia Williamsonii*

13858. *Chorizanthe stellulata*

13859. *Hemizonia Hermannii*

13860. *Lagophylla glandulosa*

13861. *Polygonum californicum*

13862. *Gilia filipes*

May 29, 1938.

3 miles from Raymond on road to
Coarse Gold, Modena Co.

13863. *Calochortus superbus* var.
robustus.

7 miles from Raymond on road to
Coarse Gold, Modena Co.

13864. *Pendemon lactus*

13865. *Galium Nuttallii* farn?

13866. *Trifolium obtusiflorum*
Glandular scutellum very acid to
taste.

13867. *Navarrelia*

13868. *Triphyllum confertiflorum*.

About midway between Raymond &
Coarse Gold, Modena Co.

13869. *Streptanthus diversifolius*
Where E. & H. No. 5451 was collected.

May 29, 1938.

4.5 miles from Coarse Gold on
road to O'Neal's, Modera Co.

13870. *Mimulus floribundus*
where E. & H. No. 5444 was collected

13871. *Phacelia* ~~sp.~~
where E. & H. No. 5445 was collected

13872. *Phacelia* ~~sp.~~
With prostrating but stems numerous
from caudex and spreading, not
few or solitary and erect.

13873. *Erysimum capitatum*
where E. & H. No. 5442 was collected.

Coarse Gold, Modera Co.

13874. *Phacelia platyloba*

13875. *Cryptantha intermedia*

May 29, 1938.

4 miles from Oakhurst on road
to Coarse gold, Modera Co.

13876. *Carex Hurdleyi*

5 miles from Oakhurst on road
to Ahwahnee, Modera Co.

13876. *Carex Hurdleyi*

13877. *Eleocharis Bolanderi*.

13878. *Wyethia foliosa*.

4 miles from Ripinnowaale on
road to Mariposa, Mariposa Co.

13879. *Eriophyllum Hermannii*

13880. *Lupinus mariposensis*, sp. n.

13881. *Lupinus robustus*

13882. *Godetia Hurdleyana*.

13883. *Godetia Hudleyana*?

Usona, Mariposa Co.

13884. *Cirsium*

May 29, 1938.

Burlingame, San Mateo Co.

June 4, 1938.

13885. *Phalaris californica*.

13886. *Vicia benghalensis*

13887. *Rubus*

♀

13888. *Rubus*

♀

Leaves & leaflets broad & blunt,
especially the third leaflet on the
sterile shoots.

13889. *Rubus*

♂

13890. *Rubus*

Only sterile shoots obtainable -
taken because of ~~the~~ cut leaflets
& their pubescence.

13891. *Rubus*

Plants naturalized along creek
bank in Blandingville.

June 4, 1938.

13892. *Senecio sylvaticus*

Open in chopwood, Throckmorton
Trail, Mt. Tanalpis. June 5, 1938.

13893. *Rubus*

♀

Shaded canyon near Fern Canyon,
Mt. Tanalpis. June 5, 1938.

June 5, 1938.

13894. *Phacelia arifolia*
Corolla tubular campanulate, the
lobes mostly erect, scarcely exceeding
the calyx. Corolla violet.
Between Fern Canyon + Azules Flat,
Matt Davis Trail, Mt. Tonalpays.
13895. *Carex debiliformis*
Azules Flat, Mt. Tonalpays on
Matt Davis Trail se. of West Point.
13896. *Carex ablata*
With preceding. *C. abrupta* + *C.*
Blunderi + *C. senatobensis* too.
13897. *Cisium montigenum*.
Flowers lavender-pink. With
preceding.
13898. *Rubus*
With preceding.

June 5, 1938.

13899. *Carex Barbarae* X *obrupta*?
East of Bootjack on Matt Levin
Trail, Mt. Tamalpais.

13900. *Carex Barbarae*
Between Bootjack and Mt.
Dieter, Mt. Tamalpais.

13901. *Carex gynodictyon*
Rock Spring, Mt. Tamalpais.

13902. *Carex Cuatrecasasii*

13903. *Carex densa*

13904. *Carex pub-broctata*

13905. *Carex densa* - discarded.

13906. *Rubus*

East of West Point on old R.R.,
Mt. Tamalpais.

13907. *Streptanthus pulchellus* Greene
Robust individual about 2 ft. tall
& widely branched growing on road
cut near Rock Spring, Mt.
Tannalpois. June 9, 1938.

13908. *Festuca pacifica*
Lowell Hill, Mt. Tannalpois
June 9, 1938.

13909. *Festuca pacifica* Grayi
With preceding; in same patch
June 9, 1938.

13909A. *Burdickia peduncularis*?
Swampy springy place east of
Bortjock, Mt. Tannalpois.
June 9, 1938.

June 19, 1938.

13910. *Senecio sylvaticus*

Plant 3 ft. tall in partial shade.
Cascade Canyon, Mill Valley,
Marin Co.

13911. *Bromus Oenotherae* var *Hallii*
with preceding. <sup>*vulgaris* *fido*
smaller</sup>

13912. *Bromus vulgaris*
Near preceding

13913. *Bromus mollis*
Zigzag Fire Trail, Mt. Tamalpais.

13914. *Festuca megalaria*
with preceding

13915. *Festuca octoflora*
Throckmorton Fire Trail, Mt.
Tamalpais.

June 19, 1938.

13916. *Navaretia squarrosa*

Habitus nephritic. With preceding.

13917. *Navaretia mellita*

Habitus not nephritic or odorous.

Corolla inverted & nearly concealed.

13918. *Rubus*

Trailing along the ground or climbing
a little way into shrubs. With
Rhododendron occidentale, *Myrica californica*
Rhamnus californica. "Azalea Flat"
on Math Davis Trail, between Fern
Canyon & Laguna Creek, Mt. Sanalpais.

13919. *Bromus laevipes*

On serpentine, Bootjack, Mt.
Sanalpais.

13920. ^{*Festuca*}~~*Bromus*~~ *californica*

With preceding.

June 19, 1938.

13921. Rubus

Trailing among azaleas and associated shrubs at Bootjack, Mt. Daniel. - These plants may represent topotypes of Rubus Eastwoodianus Rydb. The day the type of that species was collected, Rydberg was Miss Eastwood's guest on the mountain and she tells me they went to Rock Spring. In the afternoon she left Rydberg since she was to meet the Botany Club in Mill Valley and it seems not unlikely that he may have collected specimens of the blackberry around Bootjack which is not far distant from Rock Spring. Or he may have collected it along the Rock Spring Trail. At any rate it would seem that Rubus Eastwoodianus is the nearly glabrous blackberry that grows with the azaleas on the south side of the mountain.

June 19, 1938.

Head of Steep Ravine, Mt.
Tanzelpris.

13922. *Streptanthus pulchellus*

13923. *Placelia* ~~californica~~
Corolla very pale lavender.

13924. *Coryx densa*

13925. *Coryx brevicaulis*

13926. *Ceanothus*

Rattlesnake - only one shrub
seen.

13927. *Ceanothus*

With preceding.

June 19, 1938.

East
west of Rattlesnake Camp on
Trapp 80 Trail, Mt. Sanalpa's

13928. *Melica Harfordii*

13929. *Rubus*

Near preceding.

13930. *Rubus*

Unusually pubescent form growing
on road cut of old railroad to
Main Woods short distance west of
the Trestle, Mt. Sanalpa's.

June 30, 1938.

North Berkeley Hills, Alameda Co.

13931. *Gundelia*

13932. *Lupinus Bridgesii*

Stems spreading. Plant gray &
hairs more spreading.

June 30, 1938.

13933. *Lupinus juanderus*

Stems spreading. Plant green
& pubescence more appressed.

13934. *Lupinus densiflorus*

Flowers pale rosy-lavender.

13935. *Rumex transitorius*

Margin of leaves crisped.

13936. *Carex densa*

13937. *Carex gracilior*

Head of Sista Valley on edge of
bush, Contra Costa Co.

13938. *Navonita mellita*

Glandular herbages with very slight
odor, scarcely nephritic. Corolla
lavender.

June 30, 1938.

Berkeley Hills ne. of Grizzly Peak
near head of Strawberry Canyon on
n. slope in clay soil.

13939. *Cirsium Walkerianum*
Stems erect. Flowers light rose-
purple. Only 1 plant seen.

13940. *Cirsium Walkerianum*
North-east slope near head of
Wildcat Canyon, Berkeley Hills
ne. of Grizzly Peak. Colony of
dozen or so plants individuals
more or less interconnected by
slender rootstocks.

13941. *Grindelia*

North Berkeley. Heads more
leafy involucre than in no.

13931, & flowers much larger.

July 3, 1938.

near west end of Lucas Valley,
Marin Co.

13942. *Cirsium*

Plants spreading by underground
stems. Flowers sordid tan.

13943. *Angelica Tomentosa*

Serpentine slopes at head (west
end) of Lucas Valley, Marin Co.

13944. *Centaurium tricanthum*

13944A *Eriogonum vinnosum*
var. *cavicum*.

13945. *Streptanthus secundus*

Stony Point, Sonoma Co.

13946. *Guidelia*

13947. *Eryngium*

Flowers lavender.

July 3, 1938.

Stony Point, Sonoma Co.

13948. *Carex Huddleyi*.

13949. *Carex*

13950. *Carex brevicaulis*

13951. *Navaretia squarrosa*.

Herbage nephritic

13952. *Trifolium amoenum*.

13953. *Cirsium Walkerianum* var.

Stems erect, 3 ft. tall, plants
spreading by rhizomes. Flowers
aridid white at first.

July 3, 1938.

3 miles n. of Sebastopol,
Sonoma Co.

13954. *Carex brevicornis*

13955. *Rhamnus californica*.

Pittkin Marsh, Sonoma Co.

13956. *Mimulus moschatius*.

13957. *Epilobium Watsoni*.

13958. *Achillea Millefolium*

13959. *Gentiana Septentrionalis*

13960. *Cicuta Douglasii*

13961. *Zygadenus Fortunei*.

13962. *Rumex conglomeratus*

July 3, 1938.

Pekin Marsh, Sonoma Co.

13963. *Orthocarpus ammeris*

13964. *Carex Woodleyi*.

13965. *Carex Dracyi*.

13966. *Carex gracilis*

13967. *Juncus effusus* var. *pacificus*

13968. *Juncus occidentalis*

13969. *Juncus nevadensis*

13970. *Juncus bufonius*

13971. *Juncus phaeocephalus*

13972. *Navaretia viscidula*

Corolla purple, anthers lavender-blue

13973. *Lupinus formosus*.
Vallejo, Solano Co. July 4, 1938.

Senecio junctum, Swick
Meadow, Solano Co.
July 17, 1938.

13974. *Potentilla pacifica*

13975. *Cicuta Bolanderi*.

13976. *Senecio hydrophilus* var.
profusus Greene

13977. *Achillea puberula* Rydb.

13978. *Carex Barbarea*
Greene Valley, Solano Co.

13979. *Carex*
Green Valley Falls, Solano Co.

Near Green Valley Falls, Solano
Co. July 17, 1938.

13980. *Boytkinia elata*.

13981. *Lupinus albicaulis*

13982. *Cirsium venustum*.

Swiss Marshes at Suisun,
Solano Co. July 17, 1938.

13983. *Stachys albens*.

13984. *Helenium* - *Helenium*
occidentale Greene.

13985. *Bromus marginatus*
Golden Gate Park at near of
Academy Bldg. July 26, 1938.

South Fork Yuba River, ca. 5500 ft.,
Nevada Co. Aug. 1, 1938.

13986. *Sidalcea glaucescens*.

13987. *Nema Lobbii*.

3.8 miles s. of Truckee on road to
Brockway, Placer Co. Aug. 1, 1938.

13988. *Lupinus sallowii*
On sagebrush flat.

5 miles n. of Brockway on road to
Truckee, Placer Co. Aug. 2, 1938.

13989. *Urtica Breweri*.

13990. *Arnica alpina*.

13991. *Oenothera heterantha*

13992. *Eleocharis bella*.

Aug. 2, 1938.

13993. *Montia chumisasi*

1 13994. *Amaranthus californicus*

1 13995. *Trifolium prostratum*

1 13996. *Gilia capillaris*.

13997. *Arnica cordifolia*

13998. *Carex lanuginosa*

1. 14000 *Carex Jonesii*

12 14001. *Carex rostrata*

14002. *Carex aurea*

14003. *Carex fasciculata*

Aug. 2, 1938.

14004. *Carex nebrascensis*

14005. *Carex teneraeformis*

14006. *Carex microptera*

14007. *Allocaña hispidula*

Near Brockway, Placer Co.

14008. *Cirsium*

14009. *Senecio Senzarella*.

14010. *Amelanchier alnifolia*

Sand dunes on shore of Lake Tahoe
at Brockway, Placer Co.

14011. *Lupinus Breweri*.

Near Calneva, Placer Co.

14012. *Carex fructa*

14013. *Phacelia*

Salvia 254
auriculata

Nevada

Aug. 2, 1938.

Mt. Rose highway, 2.4 miles
from Incline, Washoe Co.

1 14014. *Carex subfusca*

1 14015. *Carex tenuaeformis*

1 14016. *Carex tenuaeformis*

Mt. Rose highway, 5.2 miles
from Incline, Washoe Co.

14017. *Eriogonum azaleastrum*

14018. *Lupinus candatus*

14019. *Castilleja pinetorum*

14020. *Phacelia*.

Mt. Rose highway, 6.6 miles
from Incline on dry slope, 8550
ft. elev., Washoe Co.

Nevada

Aug. 2, 1938.

14021. *Lupinus calcaratus*.

Banner faint lavender in young
flowers - later white.

14022. *Carex brevipes*

14023. *Carex*

14024. *Carex Preslii*

14025. *Carex multicostrata*

14026. *Carex festuella*

14027. *Carex stramineiformis*

Nevada

Aug. 3, 1938.

Mt. Rose Meadows n. of Incline,
Washoe Co. El. 8500 ft. These
were collected on "Third Creek"
as shown on Cal. Auto. Geo. Map.

1 14028. *Habenaria sparsiflora*.

1 14029. *Cirsium* - cf. *utahense*

14030. *Habenaria leucotoxa* Hay.

14031. *Chenopodium atroviride*.

1 14032. *Lithophagma glabra* var.
bulbifera.

14703. *Lupinus ~~formosus~~*

14704. *Castilleja Wightii rubra*

14705. *Oxalis pilosa*

14706. *Rumex crispus* ??

Sausalito, Marin Co.

14707. *Phacelia*

Corolla truly campanulate.

14708. *Lupinus noularis*

June 4, 1939.

Lagunitas, Marin Co.

14709. *Nemophila*

Inverness Ridge on road to

Pt. Reyes, Marin Co.

14710. *Ceanothus*

Spreading bush 1-2 ft. tall.

Rocky or sandy slopes near

Pt. Reyes lighthouse, Marin Co.

14711. *Lotus juncea*

14712. *Sagina crassicaulis*

14713. *Grindelia acuticarpa*

Ray 33, 32.

14714. *Godetia aurea*

Stems low & spreading; buds erect

14715. *Bromus maritimus*

14716. *Chrysanthemum*

June 4, 1939.

New Lighthouse, Pt. Reyes,
Marin Co.

14717. *Sedum spathulifolium*
Differing from inland form in
shorter thicker leaves, almost
pubescent covering ad congested cymes
of smaller flowers.

14718. *Cirsium quercetorum*
Plants perennial from rootstocks;
acaulescent or very short-caulescent;
corolla white; athers white or pale
lavender.

14719. *Cirsium Andrewsii*
Plants from top-root, biennial,
2-3 ft. tall, broadly much-
branched. Corolla rosy-purple,
anther-tube lavender.

June 4, 1939.

The two preceding grew together and with them were hybrids of two sorts - one resembling the first, the other resembling the second:

14720. *Cirsium*

Probably a hybrid (or albino?) resembling No. 14719. Erect biennial 2-3 ft. tall; corolla white, stamens - tube lavender.

14721. *Cirsium Andrewarai* x *gibberatum*

Obviously a hybrid between 14718 and 14719. - Plants seemingly from rootstocks (several stems from ground about central point and several such centers about a foot or two apart). Plants 1-1½ ft. high with widely spreading branches. Corolla white, stamens lavender.

June 4, 1939.

Herms & anales near radio
station, Pt. Reyes Peninsula,
Marin Co. - Near "Pt. Reyes P.O."
of U.S.G.S. maps.

14722. *Carex lanuginosa*

14723. *Stellaria borealis*

var. *Bongardiana*

14724. *Sidalcea rhymata*

Very robust. Petals pinkish

14725. *Viola adunca*

14726. *Scrophella paludosa*

14727. *Chrysanthemum villosa*

14728. *Lupinus grandifolius*

Banner sharply reflexed and the
outer margins somewhat involved
producing a beak, the middle

June 4, 1939.

part rosy-veined, the lower part
lavender - blue-veined; wings
purple - blue-veined, the whole purplish-
blue (lighter between veins); keel
white or lavender-tinted on lower half,
purple - black at tip. The middle
part of banner early turning to
coffee-brown, the wings becoming
brownish-tinted.

Chamaecrista

14729. *Lupinus* ~~Lagneux~~ ^{Eastw.}

Good sprouting plants much
broader than tall, to $1\frac{1}{2}$ ft. tall;
lower stems woody, shrubby.

Margin of banner + wings lavender-
blue, middle of banner whitish,
keel lavender except purple tip.

June 4, 1939.

On the dunes & downs of Pt. Reyes Park -
inland near the radio station
is a remarkable assemblage of
low & bushy perennial lupines
which seem to have originated through
hybridization. Habit varies from
prostrate to erect shrubby, pubescence
varies from appressed-sericeous to
long-villous, color of flower varies
from white to yellow and blue and
various combinations. Lupinus
sayreana is one of this aggregation
and the following are samples of
the variations displayed:

14730. Lupinus arboreus

Bush 2-3 ft. tall & as broad or
twice as broad. Flowers clear
canary-yellow.

June 4, 1939.

14731. *Lupinus arboreus*

Similar to no. 14730 but stems
appressed - pubescent.

14732. *Lupinus arboreus*

Buds (both calyx + corolla) pale
yellowish - white. Flowers when
first open: banner yellowish - white
with faint tint of lavender at base,
wings same but upper part veined
lavender - blue near claws + with
blue blotch at upper distal end;
the keel similar except purple -
black tip. Later flowers: banner
violet or pale purple, the wings
as similar but decidedly paler
here, the keel unchanged. The
whole fades to a pale buff.

June 4, 1939.

With preceding:

14733. *Lupinus Micheneri*

Stems subprostrate. Buds pale greenish-yellow except exposed blue part of keel. Banner at first canary-yellow, usually fading sordid-yellow, rarely (as in one flower) purplish. Wings lavender, the color more intense at the distal end. Keel pale yellowish-white except black-purple tip.

14734. *Lupinus Micheneri*

Stems subprostrate. Pubescence spreading. Banner yellowish or decidedly tinged with lavender. Wings & keel as in preceding.

14735. *Lupinus rivularis*

Stems erect or strongly ascending. Flowers similar in color to the

June 4, 1939.

Two preceding but colors more intense & darker. Flowers larger.

14736. *Lupinus Micheneri*

Stems prostrate. Banner very pale yellowish, especially in the middle, the margin tinged with lavender and at base deeper bluish-lavender. Wings deep purple-blue. Keel light, whitish, veined darker, the tip blackish-purple.

- N. B. Miss Eastwood said this was near *L. litoralis*.

14737. *Lupinus Micheneri*

Similar to preceding and showing persistent petioles but not a little looser. Flowers paler, the banner at first yellow becoming purplish; wings pale lavender at base, deep lavender distally.

June 4, 1939.

becoming deeper throughout; keel white with black-purple tip.

14738. *Lupinus arboreus*

Bush 3 ft. tall & about as broad.

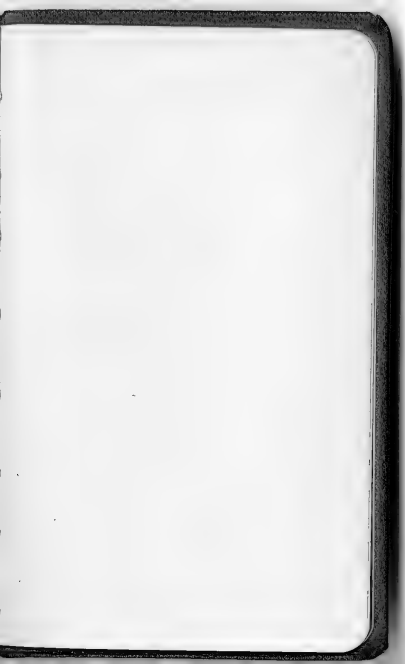

Banner at first pale, whitish tinged with yellow, blue at very base. Wings prominently veined with bluish-lavender or a more even lighter lavender, deeper tinged distally. Keel white, black-purple tipped. Banner becoming light violet, deeper than wings.

See also Eastwood & Howell collected.

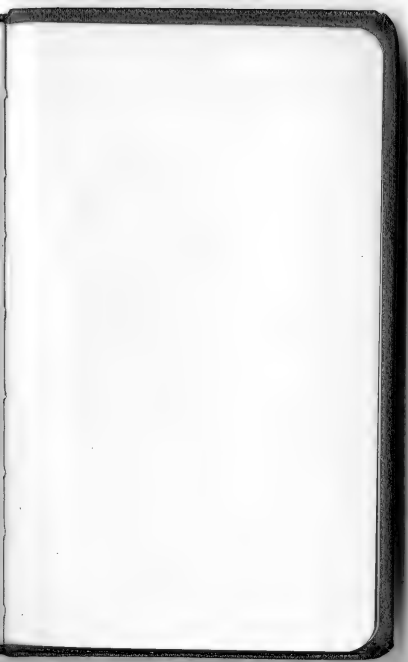

May 28 at the point: No. 7385 + 7392.

^{like *L. variicolor*}
A prostrate or subprostrate *Lupinus*, common along road, was not collected.

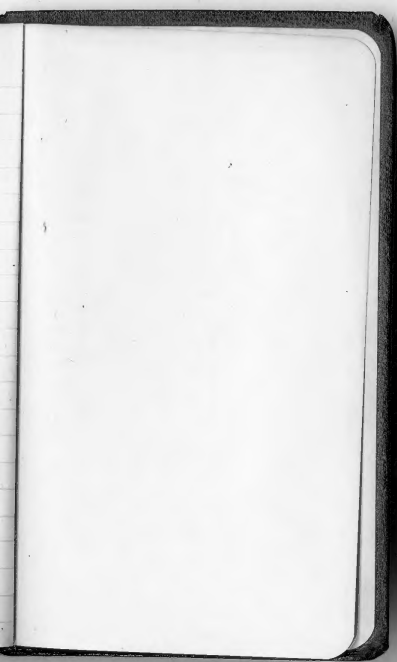

True *L. variicolor* not seen on the peninsula, but seen on road to Linn.
